

SMITH

CONSTRUCTION

The very best of British

**Total Design, Build and Maintenance
Service for all Sports Surfaces**

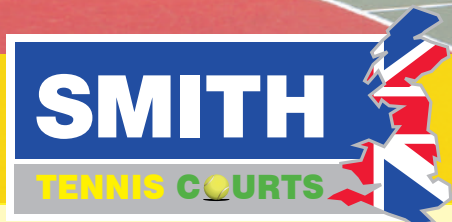

About Us

Founded in 1979, Smith Construction is a specialist design, engineering and construction company, recognised nationally for providing high quality artificial turf and grass, polymeric and natural grass surfaces, for all types of sports pitches.

Our company has constructed in excess of 700 artificial turf sports pitches, 22 athletics tracks and numerous tennis courts and multi-use games areas. We strive to provide the best experience possible for everyone included in the games using our natural and artificial turf sports pitches, from the players and coaches to the people watching and cheering them on.

As an expert, skilled general civil engineer and building contractor, our project portfolio includes pavilions, sports halls, changing rooms, car parks, landscaping and many other areas of construction. We won't compromise on safety or quality, using only the highest trained, most experienced team and best quality materials when creating our artificial pitches, as we want the best sports pitch possible for you. We take the environment seriously too, so our methods and materials are as environmentally friendly as they possibly can be.

The very best of British

Client: Ashbourne Tennis Club

Location: Derbyshire

- FIFA 1* 3g pitch performance standard.
- Funded by the Football foundation
- Full turn key package.

“ Very best value for the job...

“Smith Construction installed a new artificial grass pitch at our grounds, complete with lighting, fencing and a new car park, for use by our two hockey clubs.

Their paperwork claims for payment were accurate and provided within hours of the request, enabling our claims to the funding organisation to be submitted on time.

In short, we recommend this firm very, very highly. We know you will be given honest and straightforward advice, and the quality of the installation must be second to none. Certainly our hockey players consider that it is the best pitch they have used.

We have nothing but praise for Smith Construction, and for our Project Manager, Neil McHugh of MUGAukLtd. ”

- Extensive groundworks and remodelling.
- Full drainage strategy installed.
- Sport rebound fencing system.

“

Wow Factor...

"The all-weather hockey pitch at Worth School, constructed by Smith Construction, is in a spectacular location it certainly has a 'Wow' factor. I was extremely happy with the service provided and the quality of the pitch constructed by Smiths. It took some time to decide on the location and Smiths were very patient, surveying a number of sites before we chose the eventual location. This was not an easy site, involving extensive cut and fill, however Smith rose to the challenge with their professionalism and experience, constructing a pitch of which we are very proud. I cannot recommend Smiths too highly and would certainly employ them again for future sports pitches."
